

NEW! Robotics as a Service: ST Robotics are now offering robot systems for rental complete with grippers and accessories

Robotics Within Reach ^{TM**}

Low cost bench top collaborative robot arms - swift, accurate, easy to program - within reach financially and technically.

Industrial robot designs backed by 20 years experience of manufacture, design, quality management and production.

Why automate with a robot?

Cut production costs, reduce human error and improve quality, highest return on investment.

"This has been one of the best investments we have made, it does a great job for us." - Mesa Labs, USA

Increase production output. Robots can work round the clock.

"Arnold is still running all shifts with no problems." - Hewlett Packard

Why an ST robot?

- Unique low cost technology
- [simplicity and reliability](#) 
- zero maintenance
- unlimited technical support

"I wish all companies had customer support as helpful as yours" - Thermo-Fisher Scientific

The simplicity of the software and the robot works leaves very little to go wrong. This means maximum return on investment.
For most businesses, an ST robot pays for itself in just a few months!

Interactive intuitive software

- [Get up and running in 10 minutes](#) 
- Get help whenever you need it

"...we were all very impressed with how quickly we could get going with the robot system (especially Robwin and ROBOFORTH) and I'll definitely come straight back to you next time we need a robot arm!" - The Technology Partnership
